

Figure 70

*Nanophyetus salmincola* (commonly known as the salmon poisoning fluke) metacercariae (arrows) in the kidney of an adult coho salmon. Note minimal tissue reaction or inflammation around the parasites.

M-G G stain. X150.

Figure 71

*N. salmincola* metacercaria in the heart ventricle of a spawning coho salmon. Note again the minimal tissue reaction around the organism.

M-G G stain. X150.

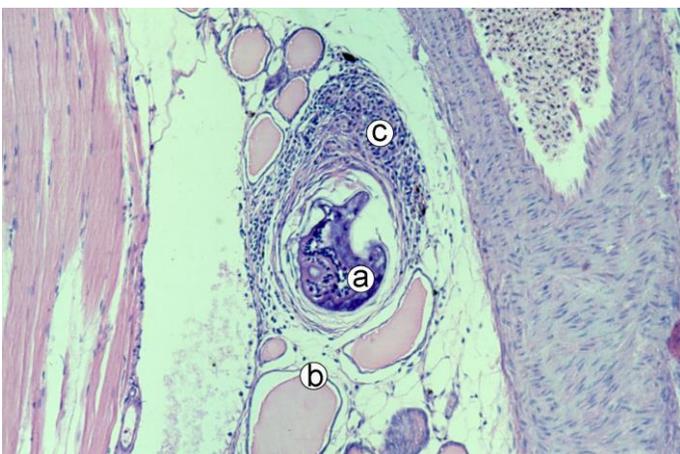

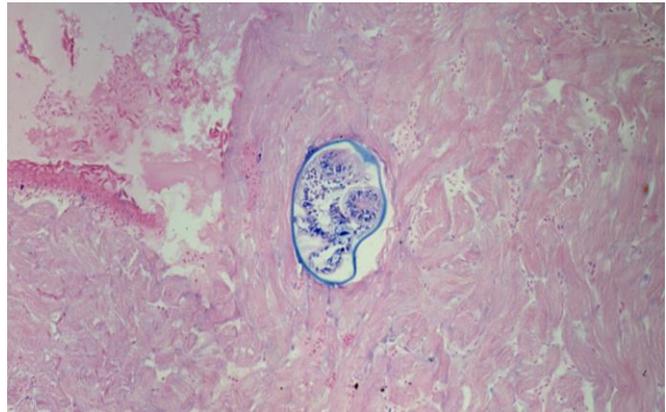

Figure 72

*N. salmincola* metacercaria (a) in thyroid tissue (b) area of a yearling coho salmon. Note the fibrosis and granulomatous reactions (c) adjacent to the metacercaria.

H&E stain. X150.
